About Me

Hello! I'm Niño Angelo Maleon, a BSIT student who enjoys designing beautiful, functional websites and learning about new technologies and innovation in web development.

My Skills

HTML & CSS, Graphic Design, Web Design, and Creative Problem-Solving.

Hobbies

I'm passionate about creating websites that reflect my love for basketball, badminton, and the world of motorcycles and cars. I enjoy blending these interests by exploring ways to connect my web development skills with the automotive industry.

About me section

services

Design

Design is where creativity meets purpose. I craft visually compelling and functional designs that tell stories, engage audiences, and bring ideas to life with a blend of artistry and technical skill.

See More

Editing

Editing is where ideas are sharpened and refined. I specialize in enhancing visuals through careful editing, thoughtful design, and purposeful development to create meaningful experiences.
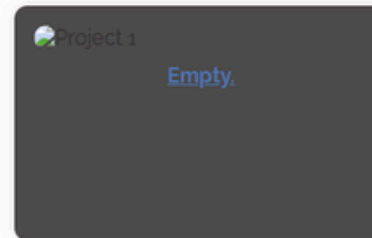

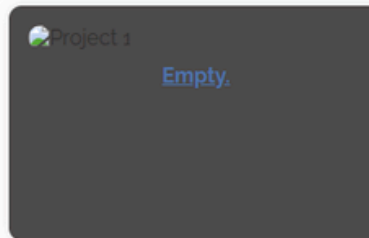

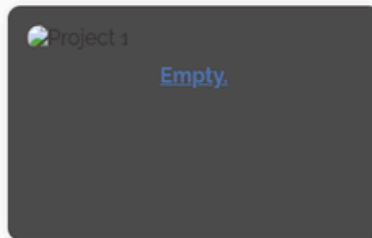

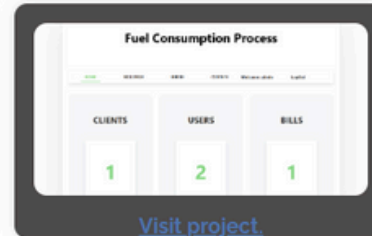

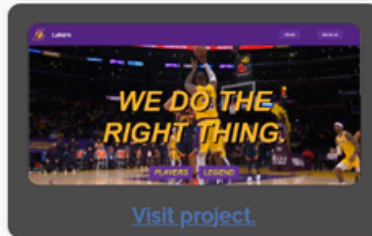

See More

Developing

Development is where creativity turns into reality. I design and build solutions that are not only visually engaging but also functional, creating seamless experiences that bring ideas to life.

Reflection

Building my portfolio has been a rewarding and challenging journey. From the very beginning, I knew that I wanted to create something that not only showcased my skills but also represented who I am as a person and as a developer. The process of designing, coding, and integrating various elements has taught me so much, and I'm proud of the final result.

The journey started with a clear vision: a sleek, interactive design that combined my passion for web development with a touch of creativity. As I worked through the project, I encountered various obstacles, such as ensuring responsiveness across different devices, perfecting animations, and making sure the content was both functional and visually appealing. However, each challenge was an opportunity to learn and grow.

I utilized multiple tools and techniques, such as HTML, CSS, and JavaScript, to bring my ideas to life. I also focused on user experience and design, aiming to create a smooth and enjoyable navigation experience. This portfolio represents not just my technical skills, but also my ability to think critically, solve problems, and stay adaptable.

Looking back, I can see how much I've learned—whether it was about web design principles, JavaScript functionality, or how to stay motivated when things get tough.

This portfolio is more than just a collection of work; it's a reflection of my journey so far. It's a symbol of my dedication to growing as a developer, my passion for creating beautiful user experiences, and my commitment to continuous improvement. I'm excited to share it with the world, and I look forward to what comes next in my web development career.
